Coffee 101

The difference between a cup of gourmet coffee and a cup of more common coffee comes down to the coffee bean. There are basically two kinds of beans, Arabica and Robusta. They are both grown all over the world. Arabica is grown at higher elevations and takes four or more years to produce a bean from the fruit of the tree and is much more difficult to grow. High quality coffee blends consist of 100% Arabica beans. Lower quality cheaper blends consist of Robusta beans which take about two years to bear fruit and can grow under harsher climate conditions. Robusta beans tend to produce a more bitter flavor. At Golden Nugget we use 100% Arabica beans for a superior tasting cup of coffee.

Honey Coconut Chicken Waffle

**WHAT’S THAT DARN BUZZER?**

The buzzer is part of our food safety and sanitation program. It is a reminder for all employees to wash their hands every hour.

**HEALTH ADVISORY**

The Illinois Department of Public Health advises that eating raw or under-cooked meat, poultry, eggs or seafood poses a health risk to everyone, but especially to the elderly, children under age four, pregnant women and other highly susceptible individuals with compromised immune systems.

Thorough cooking of animal food reduces the risk of illness. For further information, contact your physician or public health department.
